Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE three MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 29 August 2003.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.

1 The response provided by the applicant has been read and given careful consideration. Responses to the arguments of the applicant are presented after the first rejection to which they are directed. The presence of new matter would open any patent issuing from this application open to legal challenge on that basis and therefore should be avoided. Rejection of the previous office action not meeting the limitation of 16 AU or less for the ions are withdrawn due to this limitation. If the language excluding them is removed as new matter, these rejections may be reinstated without prejudice.

2 The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3 Claims 1-6,9-11,14 and 17-19 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The examiner holds the position that the limitation excluding ions of more than 16 AU atomic masses is unsupported by the specification. The specification is devoid of any such teaching and particularly on page 4 at lines 25-27 of the specification filed, which recites "...magnetic material (comprising a few atomic planes) is controllably irradiated in order to locally modify, over the regions having a width of the order of one ...". Clearly this makes no mention of any atomic weights of ions. As discussed previously, the only mention of light ions is with respect to He⁺ and heavy ions are disclosed as those having masses on the order of 100 as

discussed on page 9 of the specification at lines 13-17. This is new matter and must be removed in the next response if support cannot be found for it.

4 Claim 6 is objected to as allowable over the prior art of record and over the 112 rejection, but dependent upon rejected claims. The applicant is correct that the Amaral reference teaches away from lowering the dosage of He to below 10^{16} ions/cm² based upon its reduced effect relative to Ne at similar doses.

5 Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
